LEI Companies, Inc. Graduates from Denver Small Business Programs

Local contractor exceeds size standards in Denver programs

DENVER, COLORADO – August 3, 2015 - LEI Companies, Inc., a local Denver electrical contractor, graduated from the Denver Small Business Opportunity (DSBO) MBE, DBE and SBE programs on July 17, 2015 with unequivocal success. The purpose of the DSBO programs is to help eligible socially and economically disadvantaged companies develop and grow their business. LEI Companies' achievement of the program objectives exemplifies the DSBO intent to support healthy growth in small businesses, in parallel with ambitious and sound leadership practices.

LEI Companies, Inc. was formed in 2002 and became certified under the DSBO programs shortly thereafter. They have shown themselves to be highly capable in the face of a variety of challenges and have used the program's one-on-one counseling, training, workshops and other management and technical guidance to build a strong footing for success for many years to come. Their diligence has also served to encourage other business owners to actively use the program to its fullest.

In commenting on their achievements, Executive Vice President, Lenee Koch said, "The next evolution for LEI Companies, Inc. is to continue to be enthusiastic contributors to these programs by providing mentorship and support to other small businesses as they build capacity through these programs."

LEI Companies, Inc. remains certified as an Airport Concession Disadvantaged Business Enterprise with the DSBO, a Small Business Enterprise with RTD and a Minority Business Enterprise with the Mountain Plains Minority Supplier Development Council.

###
